Literacy and Essential Skills

What is literacy?

An international definition of literacy was established from the International Adult Literacy Survey (IALS-1994) study: “Literacy is the ability to understand and employ printed information in daily activities, at home, at work and in the community, to achieve one's goals and to develop one's knowledge and potential.”

Is literacy an issue?

Both the IALS (1994) and the follow-up Adult Learning & Lifeskills Survey (ALLS-2003), found that 42% of all Canadians have difficulty with everyday literacy tasks. The 2013 Programme for the International Assessment of Adult Competencies (PIACC) Results supported the evidence that literacy remains an issue in Canada. PIACC also indicated that those leaving the workforce have a higher skill set than those entering the workforce, resulting in a skills gap.

What are Essential Skills?

The term Essential Skills, in Canada, is generally used to refer to the system developed by Human Resources & Skills Development Canada (HRSDC) as a comprehensive description of the range of skills which are “essential” for work, learning and life. This includes Reading Text, Document Use, Numeracy, Writing, Oral Communication, Working with Others, Continuous Learning, Thinking Skills, and Computer Use. Go to the [Essentials Skills homepage](#) for further information.
